# **Alfalfa Second Cutting Nears Completion**

#### **Agricultural Summary**

Temperatures for the week ending August 15 ranged from one degree to six degrees below normal for the state. All districts reported precipitation. The southwest district reported mostly above normal rainfall for the week. Major agricultural activities included irrigating, cultivating, applying pesticides, laying grasshopper bait, cutting alfalfa, and harvesting cereal grains.

# Soil Moisture and Days Suitable for Fieldwork

Topsoil moisture is at 2% very short, 27% short, 67% adequate, and 4% surplus. Statewide, Idaho farmers had an average of 6.6 days suitable for fieldwork last week.

# **Field Crop Report**

Reports from farmers and several U of I extension educators indicate major agricultural impacts from grasshoppers and voles in several areas of the state. The Twin Falls extension educator reports that late season corn has not fully tasseled which places maturity about 2 weeks behind average. Latah County reports winter wheat harvest is starting at low elevations. Caribou County reports that farm operators have suspended irrigation of cereal crops and that harvest should begin soon. Caribou also reports that potatoes are a little behind average but look good.

# Livestock, Pasture and Range Report

Range and pasture is 62 percent in good or excellent condition. Statewide, the alfalfa second and third cutting is 89 and 31 percent complete, respectively. Twin Falls County reports that rangeland is drying out quickly and feed quality is low.
